Introduction

These PayGlobal release notes describe the software enhancements and issues resolved between the current **PayGlobal 4.75.0.0** release version and the previous PayGlobal **4.74.0.0** release version. If you are upgrading from an earlier version than PayGlobal **4.74.0.0** then you need to download and read the relevant release notes from the website.

Disclaimer

Information in this document is subject to change without notice and does not represent a commitment on the part of MYOB NZ Limited and MYOB Australia Pty Ltd. While every effort has been made to ensure that the information contained within this document and the features and changes described are accurate, MYOB NZ Limited, and MYOB Australia Pty Ltd cannot accept any type of liability for errors in, or omissions arising from the use of this information.

Notifications

Employee Self-Services Users

You will need to run the Config Updater after you have imported the Bridge Components from the v4.75.0.0 release to ensure your version of ESS continues to run.

Enhancements

This chapter describes software enhancements in this release version.

Enhancements – All Countries

Upgraded standard reports

As part of our ongoing efforts to ensure your business operates reliably and securely, we are updating our standard reports.

For a smooth transition, we have made copies of our most-used standard reports using the new reporting framework, Report Builder Pro 14.

Key Information:

- **Security and Reliability Improvements:**
The new Report Builder Pro 14 framework offers enhanced security features and improved reliability to ensure your reports are more robust.
- **Future Changes:**
The original Report Builder Pro 7 versions will be removed in a future release.
We recommend that you start replacing these old report definitions in your report groups with the new RB14 versions as part of your post upgrade tasks this release.
Transitioning to the new versions as soon as possible is encouraged to avoid any inconvenience.
- **Support for Customisations:**
If you have customized versions of these reports, please contact your Account Manager for assistance in applying your customizations to the new Report Builder 14 version of the reports.

Updated Reports:

The following reports have been updated to the Report Builder Pro 14 framework.

For any further assistance or inquiries, please reach out to your Account Manager.

Old report (RB7)	Replacement (RB14)	Country Impacted
PGPRPRIM903 A4 Designer Payslip	PGPRPRIM906 A4 Designer Payslip RB14	New Zealand & Fiji
PGPRPRIM904 Australian A4 Designer Payslip	PGPRPRIM907 Australian A4 Designer Payslip RB14	Australia
PGPRPRIM905 Australian Z-Fold Designer Payslip	PGPRPRIM908 Australian Z-Fold Designer Payslip RB14	Australia
PGSYDATA001 Standard Data Dictionary	PGSYDATA002 Standard Data Dictionary RB14	All Countries

PayGlobal NHibernate Package Upgrade

This package has been upgraded to the latest stable version to remove known security vulnerabilities. This package is used by PayGlobal to communicate with the database by Process Pay, STP and Payday Filing primarily. This has also changed the bridge components in Self-Service (ESS) and will now require the Config Updater to be run whenever a new version of PayGlobal is installed (provided you are using ESS).

Enhancements – Country Specific

No country specific improvements in this release.

Issues Resolved

This chapter describes issues resolved in this release version.

Issues Resolved - All Countries

Unnecessary Updates of Accumulating User Defined Fields During Pay Close

Details

When a pay was closed and there was an accumulating user defined field with a Leave period type configured, then unnecessary SQL update statements were made on the database for all employees who had values in the user defined field. The data values were correct, but there were potentially many update statements carried out for no reason.

Resolution

These unnecessary updates no longer occur.

Reference Number: PGDEV-7911

Rebuild Actual Accumulators / Roster Accumulators Does Not Work

Details

When either the "Rebuild Roster Accumulators" or the "Rebuild Actual Accumulators" tree action was selected in PayGlobal, these accumulators were not updated.

Resolution

These two actions will now successfully rebuild accumulators.

Reference Number: PGDEV-7921

Issues Resolved – Country Specific

No country specific issues resolved

Supported versions and environments.

Compatible environments continuously change based on the developments in manufacturers' environments that are outside the control of MYOB.

MYOB actively manages the compatibility of MYOB PayGlobal with various environments.

The following sections outline the supported versions of MYOB PayGlobal products and the minimum environments they need to run.

Employee Self-Service (ESS)

The current minimum supported version is v5.6.0.0.

You **MUST** run the Config updater following the installation of the v4.75.0.0 Bridge Components. This process controls the access to the libraries you require and ensure ESS continues to run.

Important: *If you are using an unsupported version, please contact your account manager so that we can help you upgrade to a more recent, supported version.*

Minimum Supported Environments

The minimum operating systems PayGlobal required is:

- **Desktop Operating System** - Windows 10
Note: Support for Windows 8.1 ended in January 2023
- **Server Operating System** - Windows Server 2016
Note: Support for Windows Server 2012 ended in October 2023
- SQL Server 2016 (SP3).
- **.NET Framework** – It is recommended that latest version of .NET Framework run time is installed. (Minimum is 4.8)
- **Transport Layer Security (TLS)** - TLS 1.2 is recommended but PayGlobal will fall back if the Operating System doesn't enable TLS1.2.
